

SUB: Starred LAQ No. **002C** tabled by **SHRI. SANKALP AMONKAR** regarding **LANDSLIDE RESTORATION AND SLOPE PROTECTION WORKS AT BOGDA-SADA STRETCH ON NH-566 (NH-17B), MORMUGAO** to be answered on **16th March 2026**

QUESTION	ANSWER
*Will the Minister for Public Works be pleased to state:	By Shri. Digambar Kamat, Hon'ble Minister for PWD
a) the present status of the landslide restoration and slope protection works at Bogda-Sada stretch along NH-566 (NH-17B) in Mormugao, including the percentage of physical and financial progress achieved;	<p>Sir,</p> <p>This does not fall under the purview of state PWD. The work is located on NH 566 and under the jurisdiction of National Highways Authority of India (NHAI).</p>
b) the details of the agency/contractor to whom the work has been entrusted such as: i. the name and address of the agency; ii. the mode of tendering adopted (open tender/limited tender/nomination basis); iii. the date of award of work and work order number; iv. the total estimated cost and the final contract value as per the work order issued; and v. the salient terms and conditions of the contract, including defect liability period and penalty clauses for delay;	
c) the original stipulated time frame for completion of the work and whether any extensions have been granted; if so, the reasons for such extensions and the revised completion date;	
d) the present expected timeline by which the work will be completed in all respects and the road reopened fully to vehicular traffic; whether any interim traffic management or safety measures have been put in place for commuters during the period of closure; if so, the details thereof; and	
e) whether any independent technical assessment or geotechnical study was conducted prior to finalizing the slope protection measures; if so, the details and findings thereof; and the total expenditure incurred on the said work as on date and whether any additional financial implications are anticipated; and whether the Government proposes to take any long-term preventive measures to avoid recurrence of landslides in the said stretch; if so, the details thereof?
